

Job Title: Director, Product Management
Location: Wallingford, CT

Hydrogen... the most abundant element in the universe is your ticket to a rewarding future. Every day there are reports of how hydrogen (produced by water electrolysis and renewable energy sources) is displacing fossil fuels, reducing greenhouse gasses, and helping to revitalize our planet.

Nel Hydrogen is the global leader in on-site hydrogen generation and the largest electrolyser manufacturer in the world. Armed with a full portfolio of water electrolysers and hydrogen fueling station technologies, Nel Hydrogen is leading the charge into the new green hydrogen economy.

If you are driven by personal initiative combined with loyalty and commitment to your team and the ability to convert complex issues into simple solutions, then we want to talk to you. Help make the world a better place. Join a company that is on the cutting edge of new energy innovations, with an energized, progressive culture.

POSITION SUMMARY

An immediate opportunity exists for a qualified candidate to lead the Product Management Team responsible for engineering, build support, and technical service activities associated with large scale hydrogen generation platforms. The large scale products have recently been introduced to the market and fielded products are currently supported by the development engineers; in short order this Product Management Team will need to include a technical service group to support the growing population of fielded products. This role will include management of the current product development group and the creation of the technical service group.

RESPONSIBILITIES:

- Foster a culture of safety with customers, partners, and employees
- Manage Product Development, Equipment Fabrication, and Technical Service activities for the large-scale products
- Develop Product Management Team for large scale Hydrogen Generation products by recruiting and developing high performing Engineers and Technicians
- Maintain and improve existing design, development, and technical service procedures
- Drive the execution of Product Roadmaps to support new product development and product enhancements that satisfy current and future needs of customers/markets for hydrogen generation
- Support the development of a Technical Service roadmap for large scale product platform including an understanding of customer needs, best practices, partnerships, and revenue opportunities
- Manage customer facing Product Life Cycle strategy including Product Obsolescence and Model Changes
- Maintain a customer-focused orientation and drive same within the Product Management Team
- Develop, manage, and lead a team, ensuring that necessary resources are available
- Oversee personnel, which includes work allocation, training, and problem resolution
