

## Project Manager – Project Execution

*At Nel Hydrogen A/S the vision is to empower generations with clean energy forever and with renewable sourced hydrogen Nel Hydrogen are helping the world to transition away from fossil fuels. In the Danish division in Herning they are currently more than 140 employees and expect to continue a significant growth in the coming years. The company is a global frontrunner when it comes to the development and production of hydrogen fueling stations. The market for hydrogen stations will maintain its growth in the coming years, as large-scale production of hydrogen cars, busses and trucks will be launched in the coming years.*

### About the position

An immediate opportunity exists for a qualified candidate with demonstrated project management, engineering experience and a proven track record. The successful candidate will work directly with customers, authorities, project engineers and local service and installation teams to ensure deliverables fall within the applicable scope, schedule and budget. He or she will coordinate with suppliers and stakeholders to ensure all aspects of each project are on track, both in the planning phase by your desk or being on-site.

### Your tasks will include:

- Contribute to project definition including scope and objectives in adjustment with the sales and business development team
- Create project cost calculations to support the quotation activities of the sales and business development team and ensure economic success of each project
- Review and approve the technical project scope with support of project engineering to ensure the technical feasibility of each project
- Ensure that all projects are delivered on-time, within scope and budget based on respective project definition
- Processing and quoting of frequently occurring customer change requests
- Coordinate internal resources like project engineers, installation, commissioning engineers/technicians and third parties
- Align with production on planned shipping dates and arrange shipments
- Develop project plans to be shared with customers and project team to monitor and control project progress
- Monthly follow-up on project budget vs actual together with finance controlling
- Report progress and escalate to project board as needed
- Create and maintain project documentation including customer deliverables
- Trigger payments towards suppliers and invoices towards customers based on contract payment terms
- Manage the relationship with the end customer and all stakeholders
- Work in a disciplined manner and have a strong sense of safety and quality

### Qualifications

You possess relevant educational background and experience in both project management and managing others. Experience with project installation and commissioning and HSSE is

preferred. Experience with working with authorities and Notified Bodies (NoBo). You have a strong technical- and business-orientated mindset, curious, and can quickly understand complex technical systems to find technically and commercially sound solutions. You are structured and innovative, giving you the ability to handle multiple projects simultaneously in many different countries. You excel at working independently and in teams and are highly skilled in both written and spoken English.

### **Requirements**

- Bachelor's degree in Engineering with some years of relevant experience
- Experience working in a commercial/industrial product development environment
- Well organized and solution oriented with proven working experience in technical project management
- Excellent client-facing and internal communication skills
- Excellent written and verbal communication skills
- Strong working knowledge of Microsoft Office, including MS Project Capable of working well in a multi-disciplinary technical team environment
- Able to travel approx. 50 days per year
- Experience working in or with international organizations
- General broad technical understanding of a complex piece of equipment with several subsystems
- Be a team player with great coordination skills

### **It will be beneficial if you have:**

- Experience with project management or engineering within the oil and gas industry, or the like, where there are high demands on safety
- Experience with installation and commissioning work at retail fueling sites
- Fluent or elementary proficiency in a second language like German, Korean or Japanese

### **Nel Hydrogen offers**

You are offered an exciting job where you will work in an environment where change is part of everyday life and where you, with your experience and knowledge, will greatly affect the task.

Nel Hydrogen is situated in a completely new renovated building in Lind, Herning, Denmark and offers employees a wide range of benefits such as a good canteen, health insurance and massage.

### **Application & contact**

Please send your application and CV – in English, as soon as possible to PRO&CO via the button "Søg stillingen". You can find PRO&CO through this [link](#). We are doing interviews on an ongoing basis. Start-up in the position is as soon as possible.
