We are looking for an experienced Site Supervisor who can contribute with his/hers experience and help Nel achieve success for our customers. Nel has a large number of customers and installations globally and a growing number of upcoming large installations.

As Site Supervisor you will play a key role in being Nel's on site representative to prepare and make sure that the installation is in accordance with the customer's and Nel's requirements. You will be responsible for creating and following-up work packages to suppliers at site, coordinating resources and ensuring that work is done in accordance with our safety and quality requirements.

Most important work responsibilities:

- Planning and preparing installation according to the different project scope and schedules.
- Manage and administrate key stakeholder requirements at Site
- Follow-up and administrate local installation partners
- Perform lesson learned from the installation and commissioning phases and identify areas for improvement with associated actions.
- Provide input to budgets and plans for installation and commissioning activities
- Contribute in tender phases
- Perform onsite technical inspection and minor installations of core products when required.

Formal qualifications, experience and know how

- Technical education within Mechanical, Electro or Automation
- 3-5 years' experience in installation and/or site supervisor roles.
- Experience from project organizations with high requirements on HSE, Quality and accuracy.
- Fluent in English and one Scandinavian language.
- Excellent skills in communication and collaboration between multicultural teams in a global arena

The position requires travelling.

Nel can offer:

- Full-time position
- Good development possibilities in a growing company
- Positive work environment with professionals
- Good insurance and pension schemes

We will evaluate applications on an ongoing basis - submit your application today.

Om arbeidsgiveren

Nel Hydrogen Electrolyser AS in Notodden is a subsidiary of Nel ASA, and is responsible for sales, development, engineering and production of Nel's alkaline electrolysis products.

Nel is a global, leading player in hydrogen technology and has factories in Norway, Denmark and the USA. The company's goal is to deliver environmentally friendly solutions for producing, storing and distributing hydrogen from renewable energy. Nel has a proud history of developing and delivering hydrogen plants in an international arena with roots dating back to 1927. The company's hydrogen solutions cover the entire value chain from hydrogen production technology for a number of industrial segments, to hydrogen stations for vehicles, as well as energy storage solutions.

Nel has had great success in establishing new contracts with its strategic customers and therefore needs to attract new skilled employees.
