

number one by nature

Do you want to be part of the green transition?

Project QA Engineer

As a Project QA Engineer in Nel Hydrogen Electrolyser, you will have the overall responsibility for ensuring a high level of product quality in tenders, development- and delivery projects. The QA function is responsible for management system certifications and quality assurance services to projects and process owners.

Your main areas of responsibility and tasks will be to

- ensure product quality from our suppliers through strategic sourcing work and sourcing in projects
- perform prequalification and qualification of suppliers, including supplier audits.
- ensure suitable risk assessments and controls related to product quality
- ensure compliance with requirements and relevant standards and guidelines
- review plans and technical documentation
- manage nonconformities and ensure appropriate preventive and corrective actions
- promote best-practice and communicate QHSE awareness and learning culture in Nel
- learn from experience and facilitate prioritized business improvement initiatives
- contribute to handling of customer complaints
- participate in change management to ensure proper risk management prior to implementation

It is perfect if you have

- a bachelor or master's degree preferably in mechanical or electronical engineering
- experience from delivery and/or development projects with product assurance
- excellent knowledge to QA standards, -methods and -tools
- experience within facilitating root-cause analysis activities
- experience within the QA/QHSE profession – this is not a demand, but appreciated
- a cross cultural mindset and experience with international customers

To succeed in this position, you should

- be proactive and have a risk-based and solution-oriented mind set
- build useful network of contacts and relationships through active visibility and utilize these to achieve objective
- collaborate good with others through sharing knowledge, experience and information and supporting your colleagues in the pursuit of the teams goals
- act on own initiative, make things happen and accept responsibility for the results
- be capable of balancing dilemmas and have a business perspective
- be fluent in Norwegian and English

In Nel Hydrogen Electrolyser we can offer you

- work in an international, demanding and fun environment
- great career opportunities in a fast-growing company
- a high degree of personal development and responsibility
- highly qualified co-workers who are more than willing to share their knowledge and experience
- the chance to contribute to saving our planet with clean energy in a fast-growing market

You can write your application in Norwegian or in English.
