

Experienced employee for our warehouse

Would you like to work in a dynamic and professionally inspiring environment? Do you have a broad technical background and experience and are you passionate about servicing the future sustainable energy systems? – then join us!

About the company:

Today Nel Hydrogen employs more than 170 employees, and we expect to increase this number significantly the coming years. The organisation is dynamic, and the social tone is informal and dedicated. The market for hydrogen fueling stations will grow significantly as the large car manufacturers launch their hydrogen cars, and globally the development of other new types of hydrogen vehicles gather speed as well. Nel is in the process of scaling warehouse and production capacity for series production, and this gives busy times in our company.

About the job:

We are busy in the warehouse and are looking for yet a warehouse employee who will be part of our warehouse team counting 2 employees and a warehouse Team Lead.

The tasks will vary every day, but the main tasks will be receipt of goods, warehouse replenishment, and organising, call-off from the warehouse for production or service, and warehouse control.

Further, you will be part of our global service team, which supports all local service departments. The work is based in Lind, south of Herning, which is located centrally close to the highway system. Nel Hydrogen A/S offers a nice canteen including fruit, company pension, and health insurance.

About you:

We assume that:

- You have relevant experience from a similar warehouse job.
- You know about warehouse transactions in Navision or similar ERP system.
- You have a truck certificate and driver's license.
- You prefer to be efficient and understand the importance of quality and punctuality.
- You structure your work and create good results.
- You have self-drive, and you are a self-starter.
- You are service minded.
- You have overview and thrive in a busy environment
- You chase problems until solved and secure that nothing is left unsolved.

Potentials in the job:

You will have influence on your workday and can impact your work areas. Nel Hydrogen A/S grows significantly, and the job description can be expanded, so there are perfect potentials for personal development.

Start date:

Start date is as soon as possible. Salary and conditions are negotiated individually depending on qualifications.

Application and contact:

Please forward your cover letter and resumé to: recruitment@nelhydrogen.com and please write 'Employee to Central Warehouse'. Job interviews will be planned as we receive applications.

If you need further information about this job, please call Warehouse Manager, Kristian Madsen, M: +45 2759 2919.

About Nel Hydrogen A/S | www.nel-hydrogen.com

Nel Hydrogen A/S – the former H2 Logic – is a leading manufacturer of H2Station® hydrogen stations which supply hydrogen cars with the same fast fueling and range as conventional cars. Nel Hydrogen has invested in the development of H2Station® since 2003 and today the technology is sold in markets where larger network of hydrogen stations are under establishment. Nel Hydrogen is part of NEL ASA which is listed on the Oslo stock exchange. NEL ASA is leading manufacturer of hydrogen technology to the industry and energy purposes with more than 500 deliveries in more than 50 countries.
