

# Production Engineer focusing on Engineering Changes in Production

Location: Herning

## About Nel

*Nel is a global, dedicated hydrogen company, delivering optimal solutions to produce, store, and distribute hydrogen from renewable energy. We serve industries, energy, and gas companies with leading hydrogen technology. Our roots date back to 1927, and since then, we have had a proud history of development and continuous improvement of hydrogen technologies. Today, our solutions cover the entire value chain: from hydrogen production technologies to hydrogen Fueling stations, enabling industries to transition to green hydrogen, and providing fuel cell electric vehicles with the same fast fueling and long range as fossil-fueled vehicles - without the emissions.*

## About the Department and the job

At Nel Hydrogen in Lind, Herning, we are looking for a skilled Production Engineer who can assist in handling Engineering Change Notes in the Production. As our new Production Engineer, you will be part of the Operational Excellence Department, which today consists of 7 skilled employees focusing on supporting and developing the production and technical training. The Operational Excellence is part of the Production Department, but with a focus on engineering changes you will work interdisciplinary with several other departments, such as Purchase, Development & Engineering (D&E), Production Planning, Project Execution and Product Support (PSUP)

## Responsibilities

- Receive ECNs from PSUP/D&E and coordinate the implementation in our production
- Quality Gatekeeper of received ECNs and ensure we receive sufficient information to implement the changes in a running production
- Coordinate with Production Planning and Purchasers to ensure the needed time and materials are allocated
- Follow up on the implementation of ECNs and report when finalized
- Participate in Project Handover from Production to Project Execution, with focus on implemented changes, pending changes and snagging lists
- As part of the Operational Excellence team, you will likewise be part of the daily support to, and optimization of, our production. To the extend your Change Management activities allow

## Qualifications

Strong Technical understanding. Knows how certain changes affect the production. Understand the dependencies of a given change order, and how it affects other areas, to ensure a released ECN contains the 'full package'

Educational background could be; Production Engineer, Production Technologist, Mechanical Engineer, Marine Engineer or similar

## Personal Qualifications

- Very Systematic and Structured
- Good at keeping an overview within multiple systems and can create own templates/systems to maintain the needed overview
- Collaborative across the organisation
- Feel comfortable providing feedback and ask questions on solutions to ensure the right quality and level of information in ECNs
- Manage changing priorities well
- Communicates fluently in Danish and English, verbally and in writing

## Apply

To apply, please send your application and CV as soon as possible to [recruitment@nelhydrogen.com](mailto:recruitment@nelhydrogen.com). Applications are processed on an ongoing basis.

If you want further information about the position, you can contact Team Lead for Operational Excellence Morten Kjærgaard Mortensen on +45 2213 8627 or send an email to [MORKM@nelhydrogen.com](mailto:MORKM@nelhydrogen.com)

## Equal opportunity employer

Nel is an equal opportunity employer, and all qualified applicants will receive consideration for employment regardless of race, colour, religion, sex, national origin, disability status, or any other characteristic protected by law. All employment is decided based on qualifications, merit, and business need.
